Product Group:

365 - ARB Cargo Gear

Availability Date:

August 2018

Product Specification

Growing and updating the popular range of ARB Stormproof cargo storage bags, we have introduced a new medium size Stormproof bag and took the opportunity to add a few new exciting yet functional features onto the entire range.

The new medium Stormproof bag conveniently accommodates 70 litres of cargo inside the durable, waterproof and dustproof design. With an additional 20 litres (40% increase), the medium size bag allows you to combine clothing, footwear and toiletries for an extended camping trip. The versatility of this size may even extend to combine clothing for two people for an overnight or weekend getaway.

The ARB Stormproof bags retain the large roll up (non-zip) opening, perfect access for packing and unpacking your contents. This unique rollup opening with side tie down buckles creates a waterproof and dustproof environment, allowing you to store your cargo bag outside or transport it on your ARB roof rack.

All ARB Stormproof bags now feature looped webbing straps on each side of the bag. The larger end loops accommodate tie down straps to retain your bag on the roof rack during transport, while the other loop webbing straps are suitable for attaching additional gear or hooks to the exterior of your ARB bag.

To assist with the education of our customers in the showroom, the silent salesman swing tag attached to the product has been updated to include all the features of the Stormproof bag including the internal volume (litres).

The complete range is now available in three sizes – Small (50L), Medium (70L) and Large (110L) capacity.
