**Set of two.

Creating Custom Modular Roller Drawer System

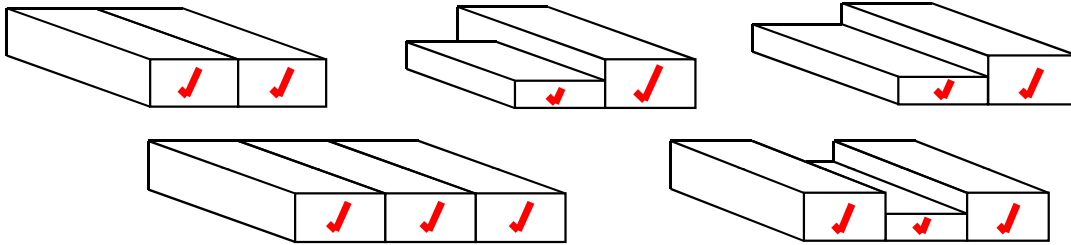

1. Create a custom roller drawer solution for your customer.
2. Suitable for covered trailers, covered trays, covered utes and more.
3. Measure available space and ensure under floor access for installation.
4. Allow a minimum of 1.5 hours per module for install time, more if access requires removal and refit of parts. E.g. Fuel tank.
5. Select desired modules and configuration.
6. Modules can be installed as single, double or multi side by side or stacked.

SINGLE-All modules can be mounted as a single.

1. Single modules bolt down with four 10mm bolts to ADR specifications.

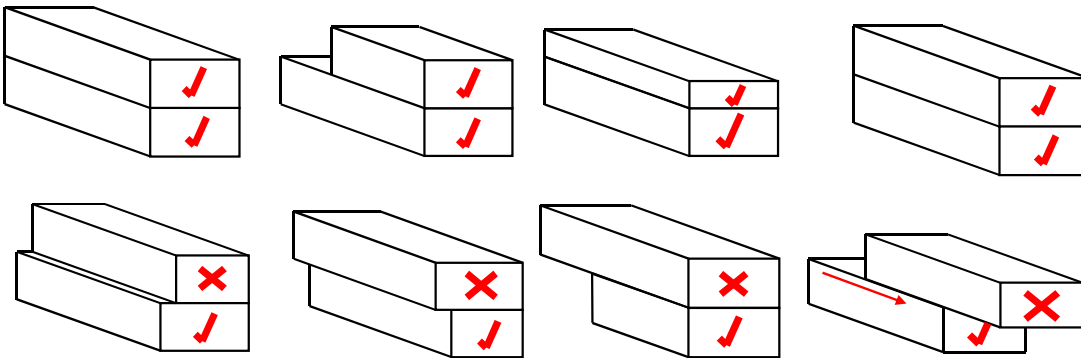

DOUBLE / MULTI- All modules can be mounted side by side.

1. Multiple modules lock together and bolt down with two 10 mm bolts per module.

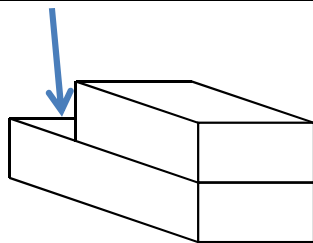

STACK- all modules can be mounted in a stack position.

1. Must be stacked on a fixed top module RD1355, RD1045, RD945, RD845, RD745.
2. Must be stacked on a module of the same width.
3. Must be stacked on a module of the same or longer length. Longer length may require extension panel.
4. Use the stack compliment chats to assist selection.

Stacker floor extensions are needed when the stacker module is shorter than the module it is stacked on.
