Description:

MID - HEIGHT ROLLER FLOOR - RFH

Application:

ARB Drawers

Part No.

See Table

Product Group:

870 – DRAWER MODULES

Availability Date:

In Stock Now

Product Specification

With all the convenience of a low roller floor and increased storage capacity in the slide out tray, ARB is proud to release a full range of Mid-Height Roller Floor Drawers.

This new Roller Floor with drawer (RFH) has an increased drawer depth of 105mm which is 30mm greater than the original Roller Floor (RF module). As a comparison, the full height RDRF (Roller Draw / Roller Floor) has a depth of 215mm.

This new 'Mid Height' roller floor drawer is the perfect height to stow your items away and still have access to the fridge on the sliding roller floor without it being too high.

The extra capacity accommodates ARB accessories such as: inflation case, personal first aid kit, jump starter, snatch strap, weekender kit and coffee mugs to name a few.

Available in 945, 1045 & 1355mm lengths, these mid-height roller floors are compatible with the existing range of full height drawers and will bolt in seamlessly with any configuration. A single carpeted side panel is also included with the Mid-Height Roller floor module for use at your discretion.

Roller Floor Mid-Height Features:

- Anti-Rollback system – locks the drawers in their fully open position stopping unintentional closing
- Anti-Rattle – Locking mechanisms on the roller drawer and roller floor eliminate movement while closed.
- Aluminum Drawer Runners – Best surface for bearings to run on and reduces unnecessary wear on components and build up on bearings.
- ARB Outback Solution Roller Drawers & Child Restraint Anchorages are Crash-tested and Compliant to ADR (Safety Requirement's) AS/NZS (Partial Cargo Barriers) ADR (Seats and Seat Anchorages) ADR (Child Restraint Anchorages).
- UV Stable – all components are UV stable including the carpet which is a high- grade marine carpet sourced specifically for ARB applications.
- Slam shut latches – Unique to ARB Drawers, easy control and operation of the drawers even when your hands are full.
- Total Weight – Lighter than most competitors' products, yet stronger.
- Side Floors – Vehicle specific side floors, that create a professional out of the box finish, and incorporate bracing to handle heavier loads and any flex in the side floors.

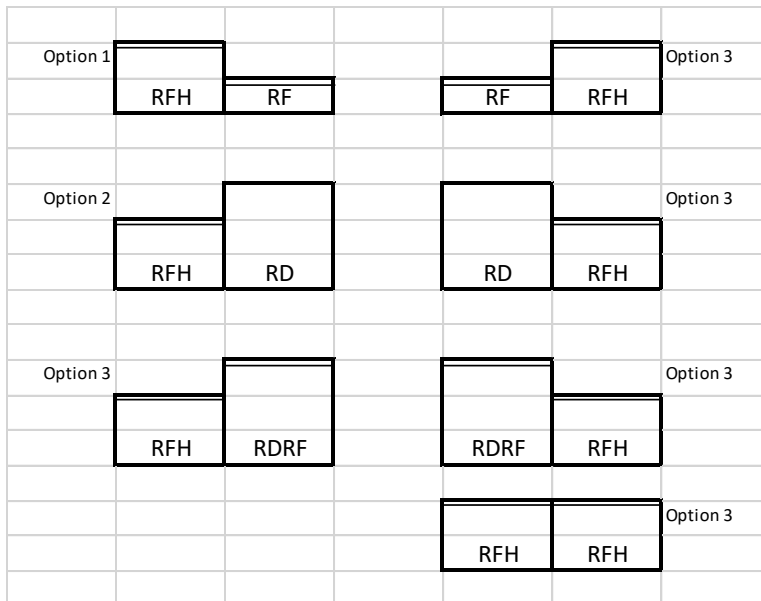

Technical Specifications

- Floor Kits are made of construction Grade ply panels and Marine Carpet to handle UV and off-road conditions
